MAPS
in the Cloud

November 17th, 2011
9 AM — 4 PM

Bring your WI-FI enabled laptop to participate in a hands on workshop showing you how to create intelligent web maps without having any GIS software installed on your computer. Esri technical staff will lead participants through a series of exercises that utilize the latest capabilities of ArcGIS Online in the morning followed by case studies in the afternoon.

Live workshop: **Double Tree**

1000 NE Multnomah, Portland, OR

Register: www.orurisa.org/Events

$20
Incl. lunch

Simulcast: **Everett Community College**

2000 Tower St, Everett, WA

Register: www.waurisa.org/Education.html

$15

Learn how to:

- Upload CSV, Shapefile, GPX and KML data sources into the ArcGIS Online Cloud and publish them in an online map at no cost.

- Embed maps into a personal or organization's website.

- Deploy maps to mobile devices including iOS, Android, and Windows Phone 7 devices.

- Mash up ArcGIS Server & ArcGIS Online hosted services, WMS services, and KML services into intelligent maps and applications that offer great performance, excellent cartography, and interactive query and reporting capability.

- Build web destinations personalized with "Maps and Apps".
