

Central Coast GIS User Group

4/08/2009

Minutes

Attendance: Amanda, Brady, Eli, Farhad, Khem, Lee, Mike Neal, Pat, Scott, Tanya

Current projects include: Willapa Bay, estuarine/upland, programming to legacy applications, 9.3 conversions, baseline marbled murrelet, and other.

Discussion:

1. Geodatabase model templates available for Marine, Utility, Energy and many others. Often template has what you need plus a whole lot more.
2. Folders and organization structure mostly focused on theme, geographic region, source, scale, or using services instead.

Business:

Khem is migrating the website. Hosting the meeting and presenting don't need to be linked. The meetings for the rest of the year (the second Wednesday of every other month): June 10th -Central Lincoln, August 12th -Lincoln City, October 14th - Lee (USDA), December 9th -Available for sign up.

The next meeting is Wednesday, June 10th. The location is Central Lincoln concerning ArcGIS customization focusing on VB.

Map Critiques:

An upland estuary poster and refuge map were critiqued.
