

Central Coast GIS User Group

10/21/2009

Minutes

Attendance: Brian, Eli, Paul, Sandy, Seth, Timothy

Current projects include: Historic signs, planning, septic tank locations, etc

Data Quality Discussion: Sandy led and facilitated a discussion on data quality. This covered metadata, data quality vs documenting the data quality, when, why, who, and accuracy, tracking for systematic differences, what percent of a project should go to metadata, and numerous other aspects.

Map Critiques:

Sandy has nice maps on display throughout the City of Lincoln City. It is a very map-centric work space.

The next meeting will be determined through the email list.
